Pocket Door Slide Systems

Did you know that Accuride was the originator of the pocket door slide?

Accuride's pocket door slides (Flipper Door Slide®) can be used for doors that open vertically or horizontally and are ideal for entertainment centres, audio visual installations, wardrobes and overhead storage units.

Recessing the door provides a space saving and neat alternative to traditional sliding doors.

For recessing pocket doors on entertainment centres, wall units and cabinets:

- Easy installation
- 4 options for varying door weights and heights
- Vertical or horizontal use
- Hold-out at maximum door extension
- Versatile: 35 or 40mm hinges for inset doors, overlay doors, thick doors

And Accuride is still at the forefront of product design with the addition of two innovative slides to the range.

For heavy and tall doors

NEW

The 1432 pocket door slide takes vertically mounted doors weighing up to a massive 34kg. With its unique anti racking cable system and ability to mount doors between 914mm and 2000mm tall this slide is ideal for wardrobes, large audio visual conference units or entertainment centres.

Features and benefits

- For door heights up to 2m and loads up to 34kg
- Synchronised slide operation
- Hinge carrier strips, hinge kits and additional connector clips available separately

Full overlay achievable

NEW

The 1321 is a totally new idea in pocket doors providing full overlay on 19.1mm doors along with a distinctive mounting style and features to prevent the danger of door scarring and damage.

Features and benefits

- Full overlay on 19.1mm side panels
- For doors up to 1065mm tall and weighing up to 14kg
- Slide rollers run across the backs of the doors to prevent damage
- Doors with sculptured fronts or applied mouldings present no problems
- Attached brackets provide a simple method for partition installation
- Auto-open feature pushes the door open the last 32mm of travel to ensure doors are fully extended
- Skid blocks with indexing marks ease installation
- Hinges included

Accuride offers a suite of slides to suit a range of door weights and sizes.

Product code	Maximum load rating (kg)	Maximum door height (mm)	Wood thickness (mm)	Additional features
