

# Accuride® blueprint

issue 01 2009

The world's pre-eminent specialist manufacturer of telescopic ball bearing slides

## Two new catalogues and lots of new products - welcome to 2009 with Accuride.

Accuride's cabinet hardware and industrial sector catalogues have been updated and expanded to include the most comprehensive range of off-the-shelf slides ever. Email [sales europe@accuride.com](mailto:sales europe@accuride.com) to request your copy or download from [www.accuride-europe.com](http://www.accuride-europe.com).

## Two-way travel for heavier loads

The latest addition to the two-way travel range is the 3630, a full extension slide taking loads up to 45kg.

### Applications

This is not just for traditional furniture where access is needed from both sides. The full extension and load ratings allow this function to be added to many more applications such as retail, industrial environments, tool storage, etc.

**AVAILABLE MAY 2009**

## 3832EC - Soft close slide to bring drawers to a gentle close

The soft close mechanism takes control of the closing action on the last 45mm of the cycle – more than usual for this type of slide - and has been finely balanced so that the drawer will open easily and yet still have enough force to pull the drawer closed smoothly and quietly.

The 3832EC is a side mounted full extension slide taking loads up to 36kg and including a front disconnect lever and drawer front adjuster to make installation quick and simple.

*The integrated soft close mechanism stops drawers from slamming shut by slowing the closing action down and bringing the drawer closed in a controlled smooth and quiet manner.*

## Features & benefits

- Load rating up to 36kg (50,000 cycles)
- 100% extension
- Soft close on last 45mm of closing cycle
- Partially shielded mechanism prevents dust or debris from interfering with the operation
- 12.7mm slide thickness
- Hold-in
- Lever disconnect for easy installation and removal
- The Cam Drawer Adjust offers installers a simple, yet precise mechanism for vertical drawer adjustment
- Stocked in 8 lengths from 350 to 700mm
- Available in zinc, black and white finishes

## Applications

The quiet and smooth operation of soft close slides, that has become a common feature in kitchen drawers, is now available for drawer applications in many other applications and settings.

The addition of the soft close mechanism makes this slide a great choice for cabinetry found in commercial or public settings such as laboratories or hospitals, libraries and retail environments. In residential applications the quality feel of a soft closing slide adds to the overall user experience.
