GB

- All fixing positions must be used to achieve maximum load rating.
- This product is capable of carrying the stated load when the structure into which it is mounted is designed to carry such loads safely.
- The final structure must be made stable and safe to carry the intended load and when the unit is fully extended.
- Fix components to shelves to prevent shifting or tipping when unit is moved in and out.

D

- Es sind alle Befestigungspositionen zu verwenden, damit der maximale Lastwert erzielt wird.
- Dieses Produkt kann die angegebene Tragkraft nur dann erreichen, wenn die Trägerkonstruktion, in die es eingebaut wird, ebenfalls eine entsprechende Tragkraft aufweist.
- Die fertige Konstruktion muss den angegebenen Lastwert sicher und stabil tragen können, wenn die Auszüge komplett ausgezogen werden.
- Teile an Auszügen anbringen, um Rutschen oder Kippen beim Ausziehen oder Schließen zu verhindern.

F

- Tous les points de fixation doivent être utilisés pour obtenir la charge maximale.
- Ce produit est capable de supporter la charge indiquée lorsque la structure dans laquelle il est monté est conçue pour supporter lesdites charges en toute sécurité.
- La structure finale doit être rendue stable et sécurisée afin de pouvoir supporter la charge prévue, même lorsque l'ensemble est complètement sorti.
- Fixer les composants sur le plateau coulissant afin de les empêcher de se déplacer ou de tomber lors de l'ouverture ou de la fermeture de l'ensemble.

I

- Per ottenere il massimo carico nominale, devono essere usate tutte le posizioni di fissaggio.
- Questo prodotto può sostenere il peso dichiarato quando la struttura in cui è montato è in grado di sostenere tali carichi in condizioni di sicurezza.
- La struttura finale dev'essere stabilizzata e resa sicura per il carico progettato quando l'unità è in posizione di estensione totale.
- Fissare i componenti agli scaffali per impedire spostamento o ribaltamento.

E

- Todas las posiciones de fijación deben ser usadas para se conseguir la capacidad máxima de carga.
- Este producto puede soportar la carga nominal cuando la estructura en la que se monta está diseñada para soportar tales cargas con seguridad.
- La estructura final deberá hacerse estable y segura para soportar la carga deseada cuando la unidad esté completamente extendida.
- Fije los componentes a los estantes para impedir el desplazamiento o vuelco cuando la unidad se mueva hacia adentro o hacia afuera.
